### CAREER HISTORY

#### Software Development Engineer

Lead School | January 2022 - Present

- Developed Genie Web from scratch, a web app that helped teachers and admins manage extracurricular activities for students, resulting in a significant increase in revenue during the holiday season.
- Created highly reusable components and hooks in Next.js for the lightweight mobile app section, Genie WebView, which allowed students to join extracurricular activity sessions.
- Contributed to the blueprint and some other sections of Epsilon, a web app that allowed Indian schools to create and manage curriculums without complications, leading to improved efficiency.
- Worked on cloning a question paper and search functionality for Assessment, a web app that helped create question papers for any class of any Indian school, increasing the productivity of teachers.
- Proficient in ReactJS, NextJs, NodeJs, TypeScript, MongoDB, ExpressJs, HTML, CSS, JSON, Redux-Saga, AntDesign, and Tailwind CSS, utilizing these technologies to build robust and efficient web applications.

### PROJECTS

#### Dine-out Clone | 🔄 🌐

A web application to book restaurants.

##### Features:

- Book restaurant at a particulate date and time.
- Login with OTP.

Tech Stack: MERN | Redux | Figma | Firebase

##### Areas of responsibility:

- Designed the whole system and built the backend.
- Implemented Redux and react-routing.
- Did the functionalities from the restaurant page to confirm the booking.

A collaborative project built by a team of 6 executed in 6 days.

#### MyGlamm-with-Backend | 🔄 🌐

A web application to buy fashion products.

##### Features:

- Sign-up/Log-in with authentication.
- Full flow of e-commerce website.

Tech Stack: Node.js | MongoDB | Express.js | EJS

##### Areas of responsibility:

- Built authentication and integrated it with the frontend.
- Laid out the database schema and built the REST API for the whole project.

A collaborative project built by a team of 4 executed in 7 days.
